CHIRANJEEV SINGH

Software Development Engineer – Java Backend

GitHub: chiran1612 — LinkedIn: chiranjeevsingh1612 — Portfolio Website — chiranjeevsingh1612@gmail.com — +91 8076388302

Summary

Java Backend Developer with 3+ years of experience building scalable REST APIs, Spring Boot-oriented backend services, and enterprise platforms using Java and MongoDB. Skilled in API integration, backend performance optimization, Nginx configuration, containerized deployment with Docker, and AI-assisted development workflows.

Work Experience

Software Developer, BISAG-N, Ministry of Electronics and Information Technology of India 2026 – Present

- Working on the CRPF e-File System, developing the Data Form module for dynamic form creation and integration with e-File workflows.
- Developing backend functionality for e-File movement and history tracking across different workflow stages.

Software Development Engineer, Kaptune Media Pvt Ltd 2022 – 2026

- Integrated GitHub, GitLab, and Bitbucket APIs to automate developer workflows, improving developer efficiency by 40–50%.
- Built customized reporting features and optimized MongoDB/Nginx configurations, contributing to revenue growth and improved backend performance.

Projects

CRPF e-File System
Enterprise e-File application for digital file creation, processing, movement, and workflow management. Working on the Data Form module for dynamic form creation and e-File movement history across workflow stages.
Tech Stack: Java, Spring, PostgreSQL [8pt]

Farmer Card App – Containerized Deployment GitHub Live Application
Built a Spring Boot and Thymeleaf app, containerized with Docker, and deployed via Docker Hub to Railway.
Tech Stack: Java, Spring Boot, Thymeleaf, Docker

Antrika: Developer Workflow Automation Platform Live Application
Automation integrating GitHub, GitLab, and Bitbucket for developer workflows and repository operations.
AI-driven code-review workflows improved developer efficiency by 40–50%.
Tech Stack: Java, MongoDB, REST APIs, GitHub API, GitLab API, Bitbucket API

Trackwick: Workforce Management Platform Live Application
Backend APIs across workforce, attendance, payroll, and task management modules.
Improved scalability and reliability for business-critical operational workflows.
Tech Stack: Java, MongoDB, REST APIs, Nginx

Learning & Development

Currently Learning: Kubernetes, Amazon Web Services (AWS – including Lambda), and Google Cloud Platform (GCP) through hands-on projects and continuous upskilling.

Education

Guru Tegh Bahadur Institute of Technology, New Delhi
B.Tech in Information Technology, CGPA: 9.0 2018 – 2023

Technical Skills

Languages	Java, C++, C, SQL
Core Java	Object-Oriented Programming (OOP), Multithreading, Collections, Exception Handling
Backend Technologies	REST APIs, RESTful Web Services, API Integration, Backend Development
Databases	MongoDB, SQL, Database Design
Cloud & DevOps	Docker, Nginx
Tools	Git, GitHub, GitLab, Bitbucket, Jenkins, Postman, SonarLint, JIRA, Redmine, Robo 3T, VS Code, Eclipse
AI-Assisted Development	OpenAI Codex, Claude, Gemini, Kiro, NotebookLM, Model Context Protocol (MCP)
